

## JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Newly retired, after spending many years working with his brother to assemble their crane business into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

All through their trip, John reacquainted himself with previous business connections along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast market for a product that could promptly and safely lift people in the air to accomplish upkeep and other building services.

After returning from their holiday, John set up a business with two of his friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The business incorporates many of the simple design essentials of that original lift into existing models.

JLG lift trucks have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into numerous marketplaces worldwide and develops new products to make certain clients are capable of being more effective and perform in the workplace within a safer atmosphere.
